TARIFF FORMAT

This tariff is divided into the following major sections:

General
Section 1: Preliminary Statement
Section 2: Rules
Section 3: Exchange Services

- A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Ca. PUC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc., the Ca. PUC follow in their tariff approval process, the most current sheet number on file with the PUC is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence** - There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets** - When a tariff filing is made with the California PUC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision.

- 6.1.1 At the time an application for service is made, an applicant may be required to pay an amount equal to one month's service charges and/or the service connection and/or equipment charges which may be applicable as well as any nonrecurring charges for any required special construction. The amount of the first month's service is credited to the Customer's account on the first bill rendered. Advance payments will not be required for usage.

6.2 Deposits

- 6.2.1 Requirement: The Company may, at its sole discretion, require an applicant or an existing Customer to post a guarantee for the payment of charges as a condition to receiving service or additional services. The fact that a deposit has been made neither relieves the Customer from complying with the Company's regulations on the prompt payment of bills on presentation nor constitutes a waiver or modification of the regulations of the Company providing for the discontinuance of service for nonpayment of any sums due the Company for services rendered. In the event that a customer requests services in addition to basic service, the average bill will reflect the aggregate services requested by the customer.

The refund will include interest at the rate set forth above. Payment of a charge is satisfactory if received prior to the date that the charge becomes delinquent provided that it is not returned for insufficient funds or closed account. SECTION 2 – RULES (CONT'D)

No. 39 Discounted Services to Qualifying Entities

- 39.1 Decision 96-10-066 and subsequent decisions, authorizes discounted services for qualifying public or nonprofit private elementary or secondary schools (K-12) and community colleges, libraries, hospitals and health clinics that are owned and operated by a municipal, county government or a hospital district, and tax-exempt community based organizations (CBOs) based in California.

Federal funding or subsidy given to California Teleconnect Fund (CTF) participants for CTF eligible services shall first be taken into account prior to applying the CTF discount.

A 50% discount on the monthly recurring charges applies to: measured business service lines, Switched 56 lines, ISDN, DSL, T-1, DS-3, up to and including OC-192 services, or their functional equivalents,¹ and Internet access services, with certain exceptions, as defined under by the FCC, are also eligible for the CTF discount. In addition, Multi-Protocol Label Switching (MPLS), a protocol that is used in conjunction with other CTF-eligible services, is also eligible for CTF discount. Qualifying entities shall be entitled to a 50% discount off posted rates or negotiated rates, whichever are lower.

There is no limit on the number of subsidized lines that a participating entity may have.

Eligible participants must notify the Company, as required by the CPUC, for which of these services they want discounts applied.

¹Prior to applying the discount, all functional equivalents must be approved by the CTF. Voice Over Internet Protocol (VoIP) is eligible as a functional equivalent to Measured Business Service Lines, and is a service that (1) enables real-time, two-way voice communications; (2) requires broadband connection from the user's location; (3) requires IP-compatible customer premises equipment; and (4) permits users generally to receive calls that originate on the public switched telephone network and to terminate calls to the public switched network.

SECTION 2 – RULES (CONT'D)

No. 39 Discounted Services to Qualifying Entities (Cont'd)

39.1 (Cont'd)

The program is funded through a surcharge on all end-users of intrastate telecommunications services. CTF applies to the following entities:

39.1.1 Schools Qualifying schools shall be entitled to a 50% discount off tariffed rates for the eligible services listed above. Only public and non-profit schools providing elementary or secondary education, and which do not have endowments of more than \$50 Million, shall qualify for the discounted rates for schools. The 50 % CTF discount applies after applying the FCC's actual E-rate. However, if a school does not have an actual E-rate, the statewide average E-rate discount will first apply prior to applying the CTF discount. Please note that the "statewide average E-rate discount" is used solely for the purpose of calculating the CTF discount. The customer is still responsible for paying the statewide average E-rate discount amount to its service provider.

All California Community Colleges qualify for the 50% discounts for the services listed in 40.1. The discount is contingent on the annual funding (adjusted yearly based on Western Consumer Price Index) availability for CCCs as set forth in Decision 08-06-20. Customers will be responsible for re-paying all discounts received that are subsequently denied by the CTF as a result of reaching the annual limit. A college needs to submit an application with its current MIS code.

39.1.2 Libraries Only those libraries that are eligible for participation in state-based plans for funds under Title III of the Library Services and Technology Act, shall qualify for the discounted rates for libraries. The 50 % CTF discount applies after applying the FCC's actual E-rate. However, if a library does not have an actual E-rate, the statewide average E-rate discount will first apply prior to applying the CTF discount. Please note that the "statewide average E-rate discount" is used solely for the purpose of calculating the CTF discount. The customer is still responsible for paying the statewide average E-rate discount amount to its service provider.

Beginning no later than September 21, 2011, rural Health Care (RHC) funding received by a RHCP shall first be taken into account prior to applying the CTF discount to the eligible service charges subscribed by the RHCP. The 50% CTF discount shall be calculated as follows:

(1) The 50% discount shall be applied to the entire CTF eligible service charges subscribed by the RHCP that does not apply for Rural Health Care (RHC) funding in a given fiscal year.

(2) The 50% discount shall be applied to the entire CTF eligible service

Qualifying CBOs shall be entitled to a 50% discount off posted rates or negotiated/contract rates, whichever are lower.

These discounted rates may not be resold to, or shared with, any other non-qualifying entity or person.

CBOs offering Head Start - beginning no later than September 21, 2011, E-rate discounts received by a CBO offering Head Start programs shall first be taken into account prior to applying the CTF discount to the eligible service charges subscribed by the CBO, as follows:

- (1) If the CBO has been approved to receive E-rate discounts, the E-Rate discount received shall be deducted from CTF eligible service charges prior to applying the 50% discount.
- (2) Effective July 1, 2012, if the CBO does not have an actual E-rate, a statewide average E-rate discount (set annually by the Commission) shall be deducted from CTF eligible service charges prior to applying the 50% discount.
- (3) The statewide average E-rate discount is deducted from the CBO's services solely for purposes of calculating the CTF discount. The statewide average discount shall be added back to the billed amount for payment by the CBO. 5.4 Caller Identification Blocking-Per Call

5.4.1 Description

Enables a customer to control the disclosure of his/her name and/or telephone number to a subscriber of Caller Identification by temporarily changing the public/private status indicator of the telephone number. A customer must dial a code before each call to change the indicator from public to private. "Public Status" allows delivery of the name and/or telephone number. "Private Status" prevents delivery of the name and/or telephone number. Per Call Blocking is provided at no charge.

5.5 Caller Identification Blocking-Per Line

5.5.1 Description

5.5.1.A Provides a permanent indicator on a customer's line. Once block is established on the customer's line, the private status can be deactivated by the customer by dialing a code, *82 or 1182 on rotary phones, before each call, to change the indicator from private to public. This one call unblock allows the name and number to be sent for that one call only.

5.5.1.B Customers who choose per line blocking for the first time will not be charged the nonrecurring charge. New customers to the Caller ID serving area will be provided the same option. A customer requesting additional changes to their per line blocking, after initial set-up, will pay a nonrecurring charge for modifying their per line blocking option.

5.5.1.C Per line blocking will be provided free to law enforcement and domestic violence agencies at any time.

SECTION 3 – EXCHANGE SERVICES (Cont'd)

No. 7 Custom Calling Service

Custom Calling Service is an optional service arrangement of central office services furnished to individual line business and residence customers. It is available within the exchange area of all exchanges served by a central office where facilities and operating conditions permit.

7.1 Description of Services

7.1.1 Call Forwarding

Call Forwarding permits the Customer to automatically forward (transfer) all incoming calls to another telephone number, and to restore it to normal operation at their discretion.

7.1.2 Call Return

Call Return allows the Customer to return a call to the last incoming call whether answered or not. Upon activation, it will redial the number automatically and continue to check the number every 45 seconds for up to 30 minutes if the number is busy. The Customer is alerted with a distinctive ringing pattern when the busy number is free. When the Customer answers the ring, the call is then completed. The calling party's number will not be delivered or announced to the call recipient under any circumstances.

7.1.3 Call Screen

Call Screen allows the Customer to automatically block incoming calls from up to ten customer pre-selected telephone numbers (including numbers from which a customer has just received a call). The list of numbers can be changed at any time. Callers whose numbers have been blocked will hear a recorded message and no usage charges will apply. The calling party's number will not be delivered or announced to the call recipient under any circumstances.

SECTION 3 – EXCHANGE SERVICES (Cont'd)

No. 7 Custom Calling Service (Cont'd)

7.1 Description of Services (Cont'd)

7.1.4 Call Trace

Call Trace allows the Customer to dial a code to automatically request that the Utility record a caller's originating telephone number and the date and time of the call as well as the date and time of the Customer initiated trace. The information is stored by the Utility and disclosed only to a law enforcement agency for investigation purposes. The customer does not receive any information regarding the origination of the calls.

7.1.5 Call Waiting

7.1.5.A Call Waiting permits the customer engaged in a call to receive a tone signal indicating a second call is waiting; and, by operation of the switchhook, to place the first call on hold and answer the waiting call. The Customer may alternate between the two calls by operation of the switchhook, but a three-way conference cannot be established.

7.1.5.B Cancel Call Waiting (CCW) allows a customer to dial an activation code prior to making a call, and cancel the Call Waiting (CW) feature. CCW must be activated each time the customer wants CW canceled. Exception: Customers subscribing to a Custom Calling Service that provides "flash privileges" such as Three-Way Calling, can activate the CCW feature while an incoming or outgoing call is in progress.

SECTION 3 – EXCHANGE SERVICES (Cont'd)

No. 7 Custom Calling Service (Cont'd)

7.1 Description of Services (Cont'd)

7.1.6 Priority Ringing

Priority Ringing differentiates incoming calls from up to ten Customer pre-selected telephone numbers by signaling the customer with a distinctive ringing pattern. If the Customer subscribes to Call Waiting, a distinctive tone is heard for the selected set of numbers. The last incoming call can automatically be added to the list of pre-selected numbers.

7.1.7 Remote Call Forwarding

Remote Call Forwarding Service is an arrangement which includes the furnishing of a network address (seven or area code + seven digit telephone number) to an applicant or Customer, which permits call completion to another network address. The Remote Call Forwarding network address must be located in an exchange area.

7.1.8 Repeat Dialing

Repeat Dialing (USOC: CRD) permits the Customer to have calls automatically redialed when the first attempt reaches a busy number. The line is checked every 45 seconds for up to 30 minutes and alerts the customer with a distinctive ringing pattern when the busy number and the customer's line are free. The Customer can continue to make and receive calls while the feature is activated.

7.1.9 Speed Calling

Speed Calling permits the customer to place calls to other telephone numbers by dialing a one or two digit code rather than the complete telephone number. The feature is available as an eight-code list or thirty-code list. Either code list may include local and/or toll telephone numbers. To establish or change a telephone number in a code list, the Customer dials an activating code, receives a second dial tone and dials either a one or two digit code (for the eight code and thirty code lists, respectively) plus the telephone number.

SECTION 3 – EXCHANGE SERVICES (Cont'd)

No. 7 Custom Calling Service (Cont'd)

7.1 Description of Services (Cont'd)

7.1.10 Three-Way Calling

Three-Way Calling permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming calls.
